Final Report of the Commission

Summary

The Commission has the honor to submit to you the final report of its work. The Commission was organized by the President of the United States in 1947 to study the conditions of the American people and to make recommendations for the improvement of the national health, education, and general welfare. The Commission has held numerous public hearings and has received many suggestions from the people. It has also conducted extensive research and has held many private hearings. The Commission believes that the conditions of the American people have improved since 1947, but that there is still much to be done. The Commission recommends that the Government should continue to work for the improvement of the national health, education, and general welfare. It also recommends that the Government should continue to work for the improvement of the conditions of the American people.
